# KEDAR PANDIT

Senior Data Business Analyst

kedar19pandit@gmail.com | +91 9764067300 | Pune, India

SQL | Databricks | Data Modeling | Data Platforms | Stakeholder Management | Agile | BFSI

**Senior Data Business Analyst** with 9+ years of experience across Business Analysis, Data Analytics, and Data Platform delivery in BFSI and enterprise ecosystems. Currently working as Associate Delivery Manager Data Architect (Data Platform Business Analyst) at Bajaj Finance, driving end-to-end data pipelines from core systems and Salesforce into Data Lake and analytics layers. Strong expertise in SQL, Databricks, data validation, and data quality frameworks, with hands-on experience in translating business requirements into scalable data solutions. Proven ability to collaborate with data engineering teams, define KPIs, and enable data-driven decision-making through BI tools like Power BI. Experienced in Agile delivery, user story creation for data platforms, and building compliant, high-impact systems in regulated environments.

## Core Skills

**Data & Analytics**: SQL, Databricks, Data Profiling, Data Validation, Reconciliation, Aggregations

**Business Analysis**: Requirement Gathering, BRD, Stakeholder Engagement, Change Management

**Platforms & Tools**: Azure Boards, Excel, Power BI

**Delivery & Process**: Agile, User Stories, UAT, Impact Analysis

**Domain**: BFSI, KYC (eKYC, VKYC, Digilocker), Customer Onboarding, Compliance Systems

## Professional Experience

**Bajaj Finance Limited**

**Associate Delivery Manager Data Architect (Data Platform Business Analyst)**

*April 2021 - Present*

Drive business and data analysis for enterprise data platform initiatives, enabling end-to-end data movement from source systems (LMS, Salesforce) to Data Lake and analytics layers. Act as a key bridge between Business, Data Engineering, Operations, and Compliance teams to deliver scalable, high-quality, and insight-driven data solutions.

**Key Responsibilities**

- Collaborate with business stakeholders to gather, analyze, and translate requirements into data platform user stories and acceptance criteria for Agile delivery.
- Work closely with data engineering teams to design and optimize data pipelines (ETL/ELT) and ensure seamless data flow across systems.

- Perform data analysis using SQL and Databricks for data validation, reconciliation, anomaly detection, and business rule checks.
- Ensure data quality, consistency, and reliability across Data Lake and downstream analytical layers.
- Contribute to data modeling discussions, helping structure data for efficient reporting and analytics consumption.
- Define and track business KPIs and metrics, enabling data-driven decision-making through reporting tools like Power BI.
- Manage Agile processes using Azure Boards, including user story creation, sprint planning, UAT coordination, and release tracking.
- Support real-time and batch data integration use cases, improving data availability and platform performance.
- Translate business requirements into logical data mappings and data flow diagrams to support data engineering implementation.

**KYC & Compliance**

- Led business and data analysis for eKYC, Video KYC, and Digilocker integrations, ensuring seamless data flow between third-party systems and internal platforms.
- Prepared solution documents, data flow mappings, and impact analysis for regulatory and compliance requirements (RBI).
- Collaborated with cross-functional teams to improve customer onboarding journeys and verification processes through data-driven enhancements.

**Key Achievements**

- Delivered Video KYC (VKYC) data integration with optimized API and data flow architecture, reducing external dependencies.
- Improved VKYC journey success rate by ~20% through data analysis and process optimization.
- Enabled near real-time, analytics-ready data availability using Databricks-based transformations and views.
- Strengthened data quality and validation frameworks, reducing discrepancies and improving business trust in data.

**<u>BMC Consultancy Services Pvt. Ltd.</u>**

**Business Consultant**

*2018 - March 2021*

- Worked in client-facing consulting roles, building strong capability in stakeholder management and business problem-solving.
- Mapped client needs to operational workflows, laying a strong foundation for analytics-driven decision support.
- Developed communication and requirement articulation skills essential for senior BA roles.

**Early Career**

**Junior Web Associate**

*2016 - 2018*

- Worked on basic HTML and web page implementations.
- Built foundational understanding of systems and developed early technical and problem-solving skills that later evolved into business and data analysis expertise.

## Education

- B.E. in Computer Engineering - Pune University, 2015
- PGDBA in Information Technology - Symbiosis (Distance Learning), 2023 - 2025

## Certifications & Training

- Google Data Analytics - Foundational training (in progress)
